

## TRAINING INFORMATION SHEET / COURSE OVERVIEW

**HOW TO EXTRACT TEST REQUIREMENTS****Course Overview**

Test requirements are the foundation of any testing project. If you get them wrong the whole project will fail.

This course is aimed at ensuring that your Test Requirements are extracted and documented with sufficient detail.

With the emphasis on putting theory into practice, this course is highly practical and attendees will apply their knowledge in real case scenarios.

**Course Objectives****By the end of this course you will be able to:**

- Identify the difference between a business requirement and a test requirement
- Demonstrate an understanding of evaluating requirements for test design, through validation and verification
- Convert a business requirement to a test requirement
- Apply techniques for creating test requirements where there is poor or no documentation
- Explain test design methodology and techniques
- Apply requirements based test design techniques
- Understand why there should be so much detail in test requirements

**Who Should Attend**

- Test Analyst
- Test Leads
- Test Managers

**Prerequisites**

- No previous testing experience required

**Duration: 3 days**
